Soda Blasting Media

AIRBLAST

Product and Applications

Airblast Soda Blasting Media are special blasting salts made from pure synthetic sodium bicarbonate. It is very soft and therefore suitable for very gentle cleaning, also of very thin metals, where the substrate may not be damaged. The material is water soluble and environmental friendly, which makes it suitable for cleaning of industrial installations and motor parts, where no residue after blasting is allowed. The material is used on ferrous and non-ferrous metals, stone, wood and more.
