

Vacancy Technician/Service technician - 40 hours/week

Sybrandy is a small company specialized in the design and production of blasting and spraying systems for a wide variety of applications and industries. Short lines and flexibility in the production process are characteristic for our company. We are looking for a Technician/Service technician for our team.

Job description

The position of Technician/Service technician is a technical role which focuses on the final assembly of our machines into a fully functional end product, covering both mechanical and electrical aspects. This role involves preparing projects for delivery both domestically and internationally, as well as assisting with the loading and unloading of shipments. In addition, the role includes providing service and maintenance for Sybrandy installations at end customers' premises.

Approximately 80% of the work is based in Heerhugowaard and 20% at customer sites in The Netherlands and abroad.

This is a full-time position for 40 hours/week.

Tasks

- Final assembly of machine parts/systems (mechanical and electrical)
- Project preparation
- Loading and unloading of lorries/containers
- Service, maintenance and troubleshooting of Sybrandy systems; mechanical, electrical and pneumatic.

Job requirements

- You have relevant technical qualifications
- You ideally have experience in a similar role
- You are flexible and able to carry out a variety of tasks
- You are willing to travel both domestically and abroad
- You are fluent in Dutch and English
- You hold a Category B driving license
- You have a forklift certificate or are willing to obtain one

Employment conditions

What can you expect at Sybrandy as a Technical service engineer?

- A salary, based on your personal knowledge and experience
- Varied work in a small, close-knit team
- A job for a longer period, with the prospect of a permanent contract
